**SMOOTH BLOW-DRY: VOLUME**

# SMOOTH BLOW-DRY: VOLUME

## step 1

Apply **smooth infusion™**, **style-prep smoother™** and **glossing straightener** evenly through damp hair.

## step 2

Rough-dry hair until 85% dry. Section hair. Use a round brush to create smooth volume as you blow-dry sides and back, section by section.

## step 3

Divide top section into 3 smaller sections. Round brush blow-dry each section and set with a large roller. Blow-dry with a diffuser.

## step 4

When hair is completely dry and cool, remove rollers, gently brush out and finger-style. Spray on **air control™** to finish.
