SMOOTH SET: WAVES

SMOOTH SET: WAVES

step 1

Apply **smooth infusion™**, **style-prep smoother™** and **glossing straightener** evenly through damp hair.

step 2

Use a curling iron at the crown and clip curls in place. Continue to curl hair across the back of the head and on each side.

step 3

Drag remaining hair up from the bottom of the head and curl and clip—left, center and right—in easy-to-handle sections.

step 4

Spray curls with **control force™**. When hair has cooled, remove clips and gently brush into waves. Finish with more **control force**.
